

REMARKS

The Office Action of December 27, 2004, correctly pointed out that a list of patents in the specification is not a proper information disclosure statement, and that references not listed on the form PTO-892 had not been considered.

Submitted herewith is an Information Disclosure Statement, including a form PTO-1449 listing U.S. patents and a published European application. A copy of the European application is also enclosed.

The drawings were objected to for including a reference numeral "17" that was not mentioned in the specification, and for including a spray head that did not have a reference number.

Submitted herewith are replacement Figures 1 and 2, which are identical to Figures 1 and 2 as filed except only that replacement Figures 1 and 2 also contain a reference numeral "18" that refers to the spray head. The reference numeral "17" has been retained in Figure 1 but now is mentioned in replacement paragraph [0029] discussed below.

The specification was objected to because the "spray head" referred to in paragraph [0025] did not have a reference numeral. Replacement paragraph [0025] submitted herewith adds reference numeral "18" to refer to the spray head. Also, replacement paragraph [0029] submitted herewith adds a sentence that describes stream "17" which appears in Figure 1.

For all the foregoing reasons, applicants respectfully submit that the previous objections to the drawings and the specification can and should be removed, and that this application is in condition for allowance.

Respectfully submitted,

A handwritten signature in black ink, appearing to read "Donald T. Black". The signature is written in a cursive, slightly stylized font.
